Objective

Front-End Web Developer with a strong focus on creating visually appealing and user-friendly digital experiences. I am dedicated to staying on top of developing technologies and industry trends, and I hope to use my knowledge of HTML, CSS, JavaScript, and numerous front-end frameworks to create engaging and responsive online applications. Seeking a position where I can use my creative problem-solving talents and collaborative approach to contribute to a dynamic team, all while consistently honing my skills to produce excellent user experiences that drive business growth and success.

Skills & abilities

I am proficient in popular JavaScript frameworks and libraries such as React, which allows me to create dynamic and engaging web applications. I provide consistent performance across multiple browsers by focusing on cross-browser compatibility. In addition, I am proficient in version control systems such as Git, which allows me to communicate efficiently and maintain code repositories with ease.

Experience

UPWORK

Freelance Web Developer | February 2020 – Present

- Developed and deployed custom websites and web applications using cutting-edge technologies such as HTML, CSS, JavaScript, and React.
- Worked directly with clients to understand their specific needs, convert their vision into concrete development strategies, and create high-quality solutions that fulfilled their business goals.
- Employed various techniques, such as image optimization, caching, and code minification, to enhance website loading times and overall performance.
- To secure user data and defend websites from possible attacks, I deployed severe security measures such as SSL encryption and server hardening.

SPECTRANET LIMITED

Intern | August 2022 – January 2023

- Assisting the network operations team in monitoring and maintaining the company's network infrastructure.
- Learning about network troubleshooting, analyzing data to identify network issues, and participating in network optimization tasks.

NXT WAVE FOUNDERS

Data Analyst | October 2022 – January 2023

- Collected and sourced relevant data from various internal and external sources, ensuring data accuracy and completeness.
 - Cleaned and preprocessed datasets, dealing with missing values and resolving inconsistencies to prepare data for analysis.
 - To discover patterns, trends, and insights, I conducted in-depth data analysis utilizing statistical methodologies and data visualization approaches.
 - Created comprehensive reports and interactive dashboards to present findings to stakeholders, enabling data-driven decision-making.
-

Education**KRISBETHEL COLLEGE****Akinogun, Lagos | Senior Secondary School Certificate**

Taken relevant subjects on Data Processing. Got a good programming foundation by learning scratch programming.

BOWEN UNIVERSITY**Iwo, Osun | BSc in Computer Science**

Taken coursework on Object Oriented Programming, Data Structures and Algorithm, Computational Analysis and Data Management.

Communication

I can engage with customers, stakeholders, and cross-functional teams to create high-quality solutions because I have excellent communication skills.

Leadership

To guarantee the timely delivery of high-quality web applications, mentor younger developers, organize project activities, and follow best practices.
